WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Collar: turned ring 120 mm outside, 96 mm inside, 25 mm tall; a lip on the housing outlet holds it so it can swivel.

Tube: 100 x 3 mm, cut at both ends so it leans outward 300 mm over a 650 mm drop; welded to the collar.

Outlet: 150 mm above the wall-top level, 1,225 mm out from the deck centre line, over the row of feed holes beside the deck.

Handle: a 12 mm bar loop on the tube to aim it.

Check: swings 30 degrees each way without touching the frame.
